

## Design method

### **1. Planning strategy —— “Acupuncture” :**

With the development of the time, the change in the midpoint of the old villages like building like context nerve point, by activating these nerve points procure the entire meridians smooth.

### **2. Architecture strategy——Tulou:**

- 1). reserved - building live specimens
- 2). rebuild-add new function box
- 3).new building- Through the construction of new buildings like the Earthen drive the economic development of the entire village, and in order to attract young people return

### **3.Space strategy—— Internal public space:**

- 1) 1.Forms of similar ancestral temple /elder — lessons
- 2)The plan of space center:landscape / small square
- 3)Marks and guide
- 4)Greenbelt and landscape
- 5)Connect space of Tulou
- 6) “Blurry space”:the uncertaintyspace of the interface

### **4.Technology strategy——Rammed earth :**

Following the motto of “high science, low tech”, based on the local traditional construction technology ,using advanced rammed-earth construction technology, which can be easily realized by villagers with manpower and simple tools. locally available construction materials: Maximizing the use of earth and local natural products.
